## **Reports of Child Maltreatment**

# **Quick Facts**

## **Volume and Description of Child Maltreatment Reports**

Maltreatment Reports Received During
4th Quarter SFY 2017

Of the 8,749 reports of child maltreatment accepted by the Arkansas Child Abuse Hotline during the quarter, 83 percent were assigned to DCFS and 17 percent were assigned to the Crimes Against Children Division (CACD) of the Arkansas State Police, which is responsible for investigating the most serious allegations of maltreatment.

Of the reports assigned to DCFS, 80 percent were assigned for an investigation and 20 percent were handled through Differential Response (DR).

DR, which was implemented statewide in August 2013, allows the Division to respond to specific, low-risk maltreatment reports through a family assessment and provision of services rather than a traditional investigation.

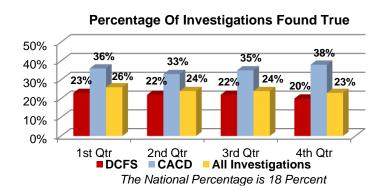

The following types of allegations can qualify for DR:

- Inadequate Supervision if children are at least five
- Environmental Neglect if children are at least three
- Medical Neglect if children are at least thirteen
- Lock Out if children are at least ten
- Inadequate Food, Inadequate Shelter, Inadequate Clothing, or Educational Neglect with no age restrictions
- Certain allegations of abuse where the incident occurred at least one year prior to the report date

## **Findings of Child Maltreatment Investigations**

Twenty percent of the investigations assigned to DCFS during the quarter were found true, compared to 38 percent for CACD. The overall substantiation rate stood at 23 percent.

Appendix A provides further detail on the number of referrals accepted for investigation and those found true for the past four quarters.

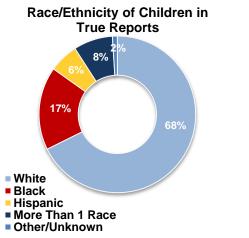

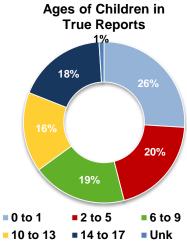

#### **Characteristics of Children Involved in True Investigations**

There were 2,255 victim children involved in the maltreatment investigations that were found true.

Of those children, 68 percent were white and 17 percent were black. Two-thirds of the children involved in true maltreatment investigations were under ten years of age.

A majority of the victim children during the quarter (53 percent) were female.

## Types of Allegations in True Investigations

The majority of the 2,255 victim children in true investigations were involved in reports involving allegations of neglect, followed by allegations of physical abuse and sexual abuse.

Percentage of Children in True Allegations of Maltreatment									
	Number of Children Cited in True Allegation	Percentage of Children Cited in True Allegation							
Neglect	1,517	67%							
Physical Abuse	453	20%							
Sexual Abuse	453	20%							

A child may have more than one allegation.

#### **Reports Involving Fatalities or Near Fatalities**

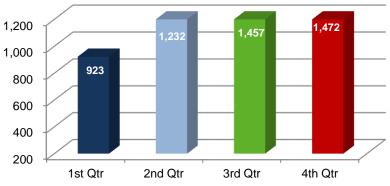

Findings of Maltreatment Reports Involving Fatalities or Near Fatalities									
Finding	Child Fatality	Near Child Fatality							
True	4	0							
Unsubstantiated	1	0							
Pending	9	0							

During the quarter, there were 14 maltreatment investigations of a child fatality and no investigations concerning a near child fatality. Of the child fatality investigations, four were found true, one was unsubstantiated, and nine are still pending.

Appendix B includes more details regarding the fatality investigations.

#### Reports Assigned for Differential Response (DR)

# **Number of Reports Assigned to Differential Response**

40%

30%

20%

10%

0%

The number of reports assigned to DR during the quarter (1,472) increased by one percent when compared to the previous quarter.

## **Allegations Cited in DR Reports**

12% 5% 4% 3% Indeeduate Food Food Inadeduate Sheller Reasons

Educational neglect and environmental neglect were the most commonly cited allegations in reports assigned to DR.

## **Meeting Agency Policies**

#### **Timeliness of Initiating Investigations**

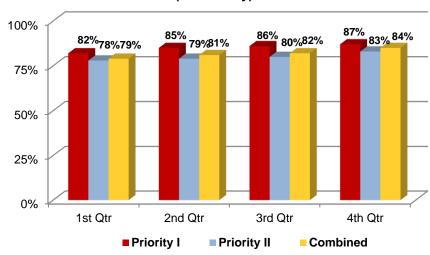

The law requires reports of maltreatment to be initiated within 24 hours of receipt of a Priority I report or within 72 hours for a Priority II report.

Priority I reports cite more severe allegations while Priority II reports cite comparatively less serious allegations.

Initiation occurs when all victim children are interviewed or observed (if too young for an interview) within the designated timeframes.

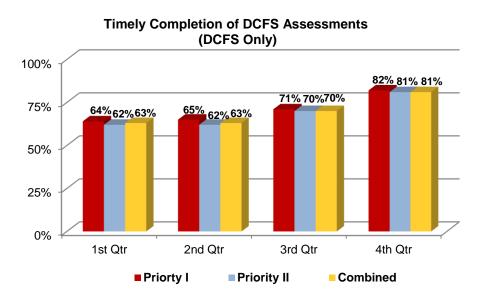

DCFS initiated 84 percent of its investigations on time during the fourth quarter.

# Timely Initiations of Child Maltreatment Assessments (DCFS Only)

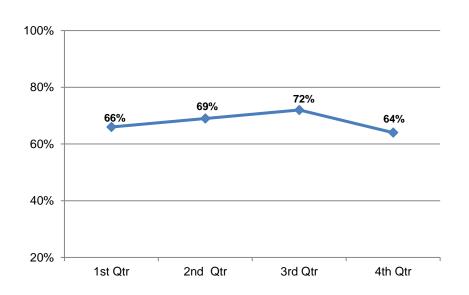

## **Timeliness of Completing Investigations**

DCFS completed 81 percent of its investigations on time (within 45 days of receipt of the report) during the quarter.

#### **Timeliness of Initiating Reports Assigned to DR**

#### **Timeliness of DR Initiations**

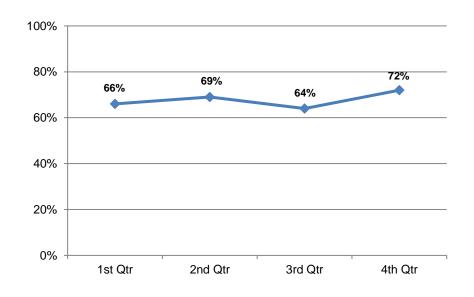

DR referrals must be initiated within 72 hours of receipt of the report.

DCFS initiated 64 percent of its DR reports on time during the quarter, representing an eight percentage point decrease in compliance from the previous quarter.

## **Timeliness of Completing Reports Assigned to DR**

#### Timeliness of DR Closures (Within 30 Days)

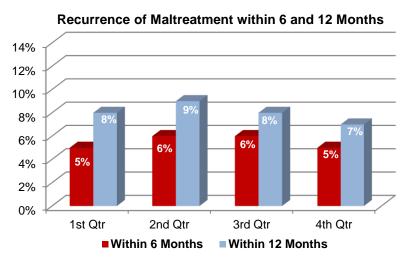

Reports assigned to DR must be closed within 30 days of receipt of the report. In certain instances when the families' needs necessitate longer involvement, two 15-day extensions can be granted, for a total of 60 days.

The Agency closed 72 percent of its DR reports on time, taking into account reports in which extensions were granted.

#### **Benefits to Children and Families**

#### **Preventing the Recurrence of Maltreatment**

Seven percent of the victim children involved in true investigations one year ago experienced a recurrence of maltreatment within 12 months. Five percent experienced a recurrence of maltreatment within six months.

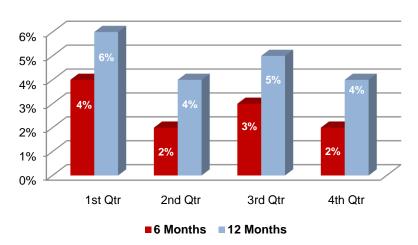

The National Standard for absence of recurrence within six months is 5.4 percent or less

## Absence of Recurrence Among Families who Received DR

Four percent of the children who began receiving DR services in the fourth quarter of SFY 2016 were involved in a true investigation of child maltreatment within 12 months, and two percent were involved within six months.

#### Percentage of Children Involved in True Maltreatment Reports Within Six and Twelve Months of Receiving DR

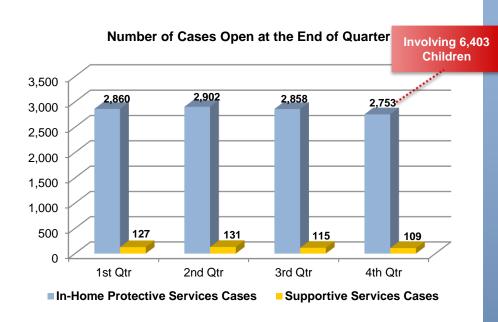

## **In-Home Services**

# **Quick Facts**

## **Volume and Description of Cases**

#### **Volume of Cases**

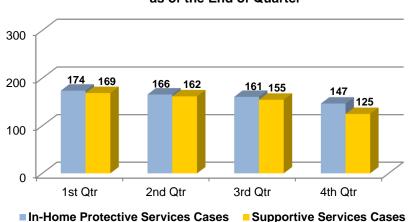

In most instances, DCFS offers inhome services through a protective services case, which is opened when a true maltreatment report or court order necessitates DCFS' involvement with a family but there is not an immediate threat to any child's safety in the home.

The number of in-home protective services cases decreased by four percent during the quarter. At the end of the quarter, there were 2,753 in-home cases open across the state, involving 6,403 children.

The Division also offers some inhome supportive services to families on a voluntary basis. DCFS was responsible for 109 supportive services cases at the end of the quarter.

## **Length of Time Cases Have Been Open**

## Average Number of Days Cases Have Been Open as of the End of Quarter

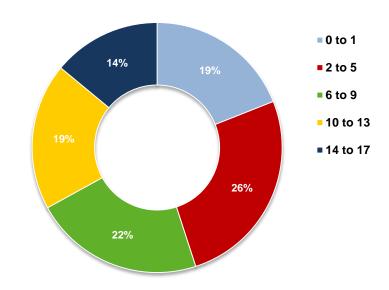

The average length of time inhome cases were open as of the end of the quarter was roughly five months (147 days). Supportive services cases were open, on average, just over four months (125 days).

#### Ages of Children in In-Home Cases

Children ages two to five make up the largest group of children involved in in-home cases at the end of the quarter.

#### Ages of Children in In-Home Cases

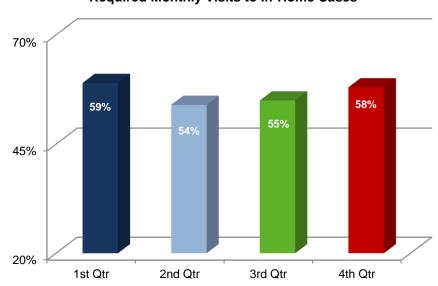

## **Meeting Agency Policies**

#### **Monthly Visits to In-Home Cases**

On average, 58 percent of the in-home cases received a monthly face-to-face visit from a caseworker during the quarter.

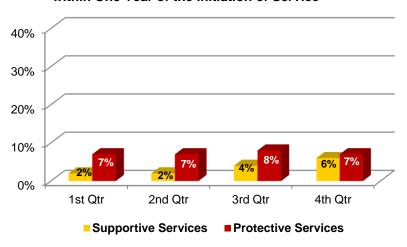

#### **Required Monthly Visits to In-Home Cases**

#### **Benefits to Children and Families**

#### Victimization Rate Among Children Who Received Protective and Supportive Services

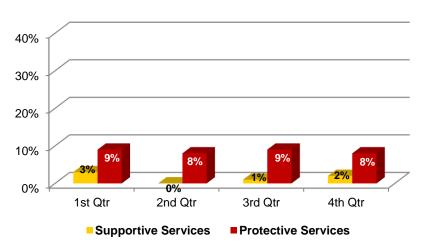

# Percentage of Children Receiving Supportive and Protective Services who were Abused or Neglected within One Year of the Initiation of Service

Of the children who began receiving supportive services during the fourth quarter one year ago, six percent experienced a true report of maltreatment within one year. During that same time frame, seven percent of the children who began receiving in-home protective services were involved in a true report within one year.

## Rate of Entry Into Foster Care Among Children Who Received Protective and Supportive Services

# Percentage of Children Receiving Supportive or Protective Services who Entered Foster Care within One Year of the Initiation of Service

Of the children who began receiving supportive services during the fourth quarter one year ago, two percent entered foster care within one year of the initiation of those services. Eight percent of the children who began receiving protective services during the same timeframe entered care within one year.

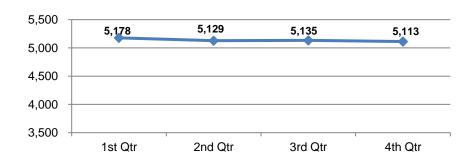

In-home services prevent the vast majority of the children from being re-victimized or entering foster care within one year.

## **Volume and Description of Cases**

#### **Number of Children in Foster Care**

There were 5,113 children in foster care at the end of the fourth quarter of SFY 2017. This signified a slight decrease from the previous quarter.

## Number of Children in Foster Care at End of the Quarter

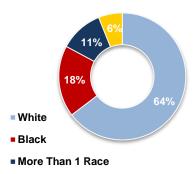

#### **Characteristics of Children in Foster Care**

Children two to five years of age (24 percent) represented the largest group of children in care. Sixty-four percent of those in foster care were white and 18 percent were black.

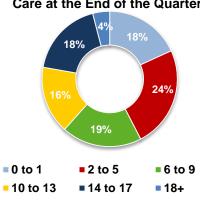

Of the children in foster care at the end of the quarter, 52 percent were male and 48 percent were female.

## Race/Ethnicity of Children in Care at the End of Quarter

Hispanic

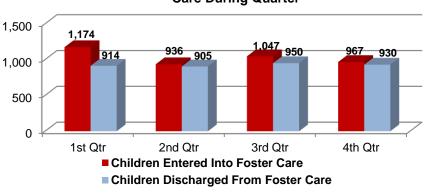

## Ages of Children in Foster Care at the End of the Quarter

## **Admissions Into and Discharges From Foster Care**

During the fourth quarter of SFY 2017, more children entered foster care than were discharged.

#### Number of Admissions Into and Discharges From Foster Care During Quarter

#### Reasons for Children's Entry Into Foster Care

# Reasons for Children's Entry Into Foster Care 4th Quarter SFY 2017

Placement Reason	Number of Entries	Total
Substance Abuse	495¹	51%
Neglect	478	49%
Parent Incarceration	203	21%
Physical Abuse	111	11%
Inadequate Housing	84	9%
Sexual Abuse	39	4%
Caretaker Illness	33	3%
Child's Behavior	25	3%
Truancy	15	2%
Court Ordered Foster Care in FINS Case	10	1%
Other	36	4%

Substance abuse and neglect were the most prevalent reasons for children entering foster care.

## Reasons for Children's Discharge From Foster Care

# Reasons for Children's Discharge From Foster Care 4th Quarter SFY 2017

Discharge Reason	Number of Discharges	Total
Reunification	378	41%
Relative Custody	254	27%
Adoption	235	25%
Child Aged Out	39	4%
Custody Transfer to Another Agency	10	1%
Non-Relative Custody	9	1%
Other	5	1%

National data indicate that the three most prevalent reasons children leave care are reunification (51%), adoption (21%), and emancipation (9%).

Sixty-eight percent of the children who left foster care during the quarter were reunified either with their own family or that of a relative. Arkansas (93 percent) exceeds the national average of 81 percent of the children either going home, to a relative, or to an adoptive home.

<sup>&</sup>lt;sup>1</sup> These 495 cases of substance abuse include 430 instances of parental drug abuse, 40 instances of parental alcohol abuse, 18 cases of drug abuse by children, and seven case of alcohol abuse by a child.

Of the children in foster care at the end of the quarter, 47 percent had been in care for at least 12 months, if not longer.

# Length of Stay in Foster Care for Children in Care 4th Quarter SFY 2017

	Number	Percentage	National
Less than 30 days	295	6%	6%
1-3 Months	496	10%	23%
3-6 Months	742	15%	23/6
6-12 Months	1,189	23%	20%
12-24 Months	1,323	26%	25%
24-36 Months	480	9%	12%
36+ Months	588	12%	15%
Total	5,113	100%	100%

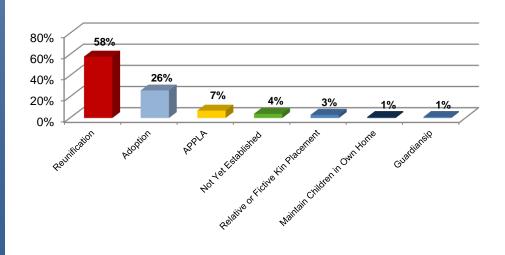

## **Permanency Goals of Children in Care**

Forty-seven percent of the children in foster care at the end of the quarter resided in foster family homes.

Overall, 76 percent of the children resided in a family-like setting (foster family home, therapeutic foster home, relative care, pre-adoptive home, trial home visit) at the end of the quarter.

Fifty-eight percent of the children in care at the end of the quarter had a permanency goal of reunification (return home), and 26 percent had a goal of adoption.

Permanency Goals of Children in Foster Care at the End of the Quarter

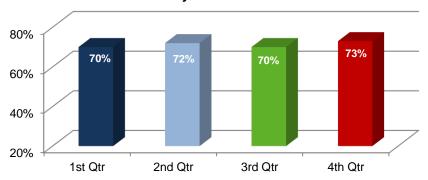

#### **Meeting Agency Policies**

#### **Monthly Visits to Foster Children**

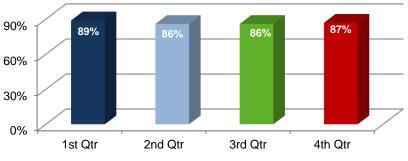

Seventy-three percent of the foster children statewide received a monthly face-to-face visit from a DCFS caseworker, on average, during the quarter. To ensure their safety and wellbeing, best practice requires foster children to be visited at their placement by their caseworker monthly (measured in this chart).

Eighty-seven percent of the foster children received a monthly face-to-face contact from *any* DCFS staff member, regardless of the staff member's position, location of the visit, or the purpose.

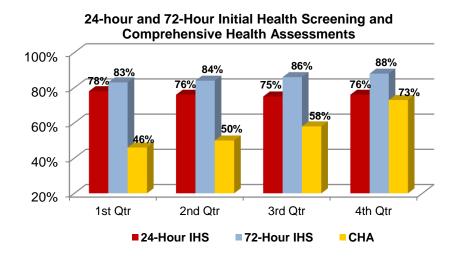

## Foster Children who Received Monthly Face-to-Face Visits by Caseworkers

# Foster Children who Received Monthly Face-to-Face Visits by Any DCFS Staff

## **Initial Health Screenings and Comprehensive Health Assessments**

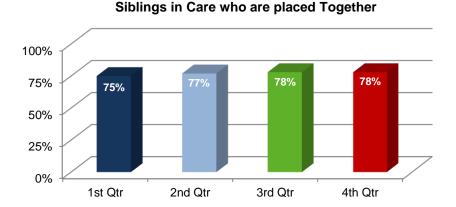

When a child enters foster care due to an allegation of severe maltreatment, DCFS must conduct an Initial Health Screening (IHS) within 24 hours. All other incoming foster children require health screenings within 72 hours. Children must also receive a Comprehensive Health Assessment (CHA) within 60 days of entering foster care.

DCFS completed 76 percent of its required 24-hour IHSs, 88 percent of its 72-hour IHSs, and 73 percent of its CHAs on time.

#### Percentage of Siblings in Placement Who Are Placed Together

At the end of the quarter, 78 percent of the children with siblings in foster care were placed with at least one of their siblings, while 60 percent were placed with all of their siblings.

These figures do not exclude children who were placed separately for valid reasons such as safety issues or court orders.

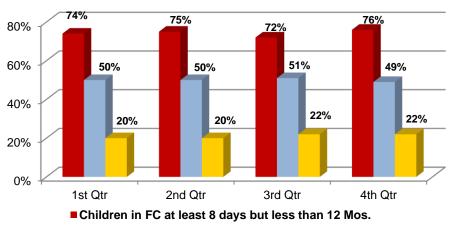

## **Placement Stability of Children in Foster Care**

Placement stability is measured by the percentage of children with two or fewer placements who are in care for varying lengths of time.

Of the children in care for less than 12 months, 76 percent experienced two or fewer placements; the national standard is 86 percent. Of the children in foster care between 12 and 24 months, 49 percent had two or fewer placements; the national standard for this group is 65.4 percent. Finally, of the children in care for over two years, only 22 percent experienced two or fewer placements, with the national standard being 41.8 percent.

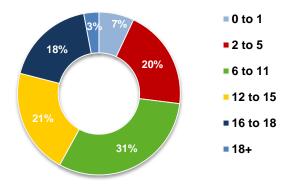

Regardless of the length of time in foster care, 2,170 of the children in care at the end of the quarter had experienced three or more placements during their time in foster care. Children six to 11 represent the largest group of children who experienced such volume of placement changes.

## Children in Foster Care who have Experienced Two or Fewer Placements

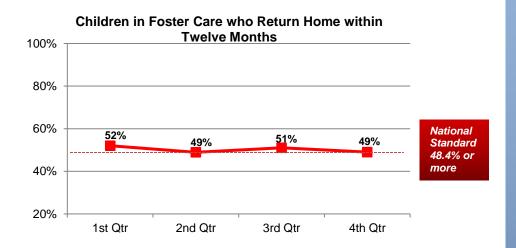

- Children in FC at least 12 Mos. But less than 24 Mos.
- Children in FC more than 24 Mos.

## Ages of Children who Experienced Three or More Placements

#### **Benefits to Children and Families**

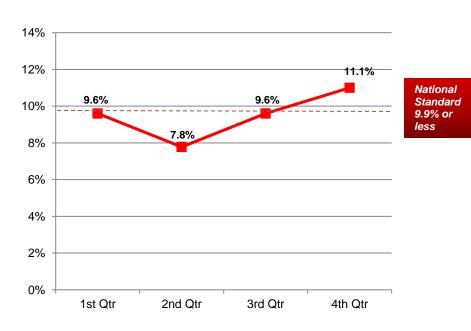

#### Children in Foster Care Who Return Home Within Twelve Months

Forty-nine percent of the children who entered foster care during the fourth quarter one year ago returned to their families within 12 months, exceeding the national standard of 48.4 percent.

#### **Preventing Children's Re-entry Into Foster Care**

#### **Re-entries Into Foster Care**

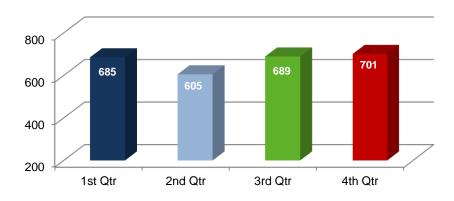

Of the children who were discharged to their families during the fourth quarter one year ago, 11 percent re-entered foster care within 12 months of their discharge from care. The Division did not meet the national standard of 9.9 percent or less for this quarter.

## **Volume and Description of Cases**

## Children Available for Adoption <sup>2</sup>

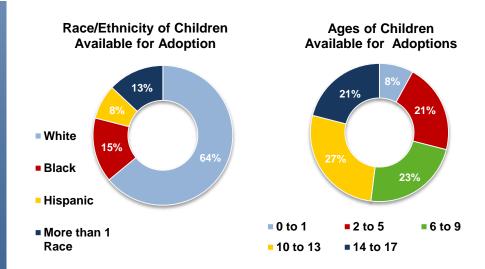

At the end of the quarter, 701 children were available for adoption.

# Number of Children Available for Adoption at the End of the Quarter

#### **Characteristics of Children Available for Adoption**

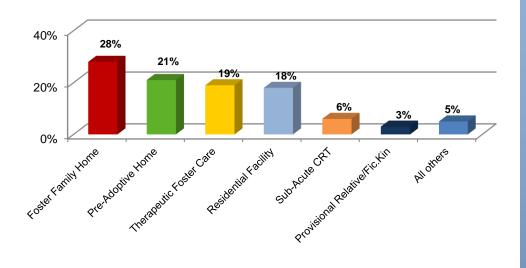

Of the available children, 64 percent were white and 15 percent were black. Half of the children available for adoption were between the ages of six and 13 years old.

<sup>&</sup>lt;sup>2</sup> Children available for adoption are defined as those who have a termination of parental rights on both parents and a goal of adoption.

#### **Placement of Children Available for Adoption**

## Placement of Children Available for Adoption at the End of the Quarter

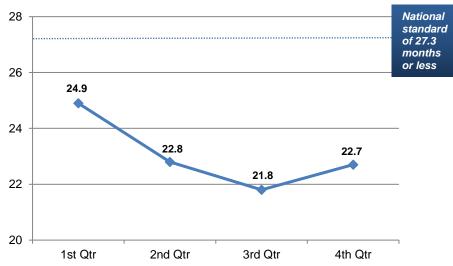

Nearly half of the children available for adoption at the end of the quarter resided in either a foster family home or a preadoptive home. Another three percent resided in provisional relative or provisional fictive kin settings.

#### **Meeting Agency Policies**

#### **Length of Time to Adoption**

# Length of Time From Entry into Foster Care to Finalization of Adoption (Months)

The median length of time from entry into foster care until finalization of adoption for children whose adoptions were finalized during the fourth quarter was 22.7 months, meeting the national standard.

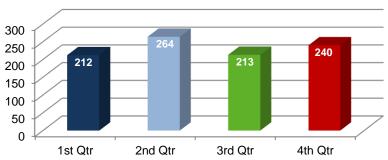

#### **Benefits to Children and Families**

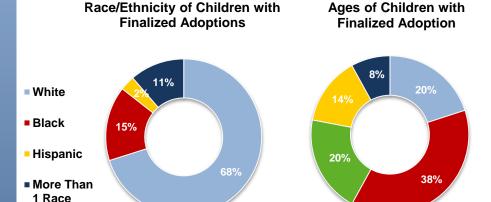

#### **Finalized Adoptions**

Two hundred and forty adoptions were finalized during the fourth quarter of SFY 2017.

Children ages two to five were the largest group among those adopted during the quarter.

## Number of Adoptions Finalized During the Quarter

#### **Subsidized Adoptions**

Subsidies are given to children with special needs, defined as:

- Caucasian and over nine
- African-American and at least two
- At least two members of a sibling group
- Children who have severe medical or psychological needs that require ongoing treatment
- Children at high risk for the development of serious physical, mental, or emotional conditions documented by a medical professional

■ 0 to 1 ■ 2 to 5 ■ 6 to 9 ■ 10 to 13 ■ 14 to 17

During the fourth quarter, 219 children began receiving adoption subsidies. Of those, 215 were federally-funded subsidies and four were state-funded.

During the quarter, a total of 6,016 children received adoption subsidies.

## Resources

# **Quick Facts**

#### **Caseworkers and Caseloads**

#### Caseloads at the End of the Quarter

As of the end of the quarter, the

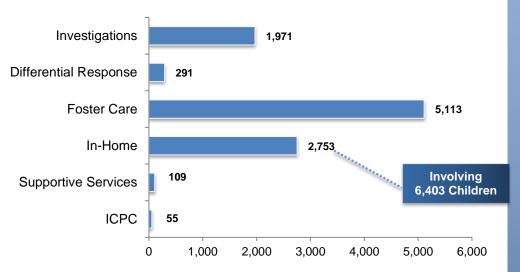

**Division was responsible for:** 

• 1,971 investigations of child maltreatment and 291 DR cases;

- 5,113 foster care cases;
- 2,753 in-home protective services cases, involving 6,403 children;
- 109 supportive services cases and 55 interstate compact for the placement of children (ICPC) cases.

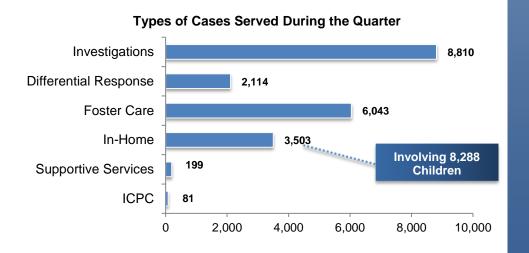

This is while the Division was staffed with 436 family service workers, who were responsible for handling these cases.

Types of Cases at the End of the Quarter

One foster care case is equal to one child in care; one in-home or supportive services case constitutes an entire family, many of which have multiple children.

#### **Caseloads Handled During the Quarter**

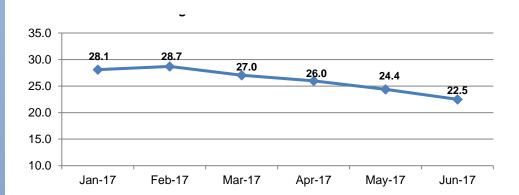

This graph shows the number of cases that cycled through the system anytime during the quarter (as opposed to those open at the end of the quarter, described above).

The Division oversaw 8,810 investigations; 6,043 children in foster care; 3,503 in-home protective services cases; 2,114 DR cases; 199 supportive services cases; and 81 ICPC cases.

The average caseload statewide stood at 22.5 cases per worker at the end of the quarter. This average is above the standard of about 15 cases per worker set by the Child Welfare League of America.

The average caseload for each county as of June 2017 is presented in Appendix E.

#### **Foster Homes**

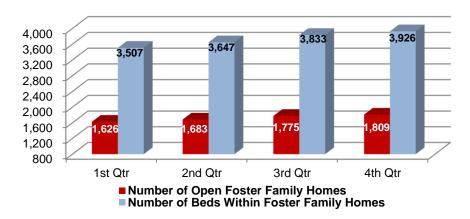

#### **Foster Homes and Beds**

There were 1,809 licensed foster family homes open statewide at the end of the fourth quarter, providing a total of 3,926 available beds.

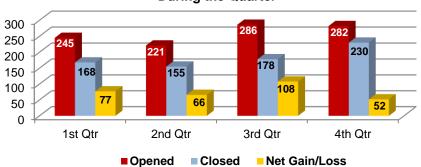

During the quarter, 282 new foster homes were opened and 230 were closed, for a net gain of 52 homes.

Appendix F displays the closure reasons for the foster homes that closed during the quarter.

#### Number of Foster Homes and Beds at the End of Quarter

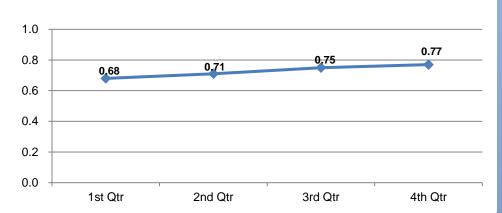

#### Number of Foster Family Homes Opened and Closed During the Quarter

#### Ratio of Foster Home Beds to Foster Children

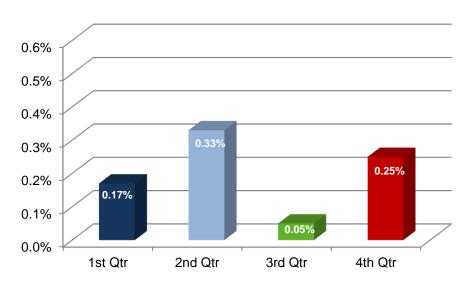

#### **Foster Bed to Foster Child Ratio**

The ratio of licensed foster home beds to children in foster care was less than one (0.77) at the end of the quarter, even though consistent improvement has been observed during the last four quarters.

#### **Percentage of Foster Families with True Reports of Maltreatment**

# Percentage of Foster Families with True Reports of Maltreatment

Five reports in which foster parents were identified as alleged offenders were determined to be true during the quarter. Based on the 2,002 foster homes active during that period, the percentage of foster families with a true report of maltreatment was 0.25 percent.

Appendix G provides more detail on maltreatment reports concerning foster homes.

Appendix A: Breakdown of Child Maltreatment Reports Received During the Quarter and Substantiation Rates of Maltreatment Investigations<sup>3</sup>

		DCF	S		CACD				
	Total Assessments Assigned for DR	Total Assessments Assigned for Investigation	True Investigations	Percent True	Total Assessments Assigned for Investigation	True Investigations	Percent True		
First Quarter 2017	854	5,712 5,096 Closed	1,194	23%	1,527 1,370 Closed	494	36%		
Second Quarter 2017	1,163	6,509 5,888 Closed	1,336	23%	1,508 1,417 Closed	475	34%		
Third Quarter 2017	1,283	5,562 5,389 Closed	1,161	22%	1,411 1,307 Closed	468	36%		
Fourth Quarter 2017	1,630	5,946 5,938 Closed	1,196	20%	1,488 1,340 Closed	508	38%		

\_

<sup>&</sup>lt;sup>3</sup> The data cited in this appendix run two months behind the referenced quarter (e.g., the fourth quarter refers to 2/1/2017 through 4/30/2017); as a result, the numbers cited in this appendix differ from those cited throughout the report which considers the actual quarter. This is because investigations have a 45-day completion timeframe and this allows enough time to pass to measure the disposition of the investigations. An investigation is excluded from the calculation of the substantiation rate in the event that it has not yet been closed (and thus a disposition has not yet been rendered).

## Appendix B: Summary of Reports Involving Child Fatality

## **True Fatality Reports**

Child	County	Age	Race	Gender	Date of Death	Allegations or Preliminary Cause of Death	Placement at the Time of Incident	Relationship of Alleged Offender to the Child	Agency Conducting the Investigation	Legal Action By the Department	Services Provided Prior to the Incident	Services Provided After the Incident

#### **Appendix G: Summary of Foster Care Maltreatment Reports**

#### Characteristics of Children in Foster Care Involved in Allegations of Maltreatment, 4th Quarter SFY 2017

One hundred and thirty five reports of alleged maltreatment, involving 157 children in foster care, were received by the hotline during the fourth guarter of SFY 2017.

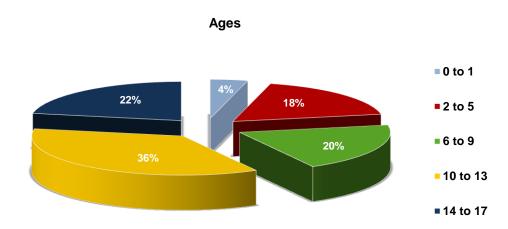

In 42 reports involving 51 children, foster parents<sup>4</sup> were identified as the alleged offenders. As shown in the following chart, five of those reports were found to be true and all five home were subsequently closed.

Foster Home Maltreatment Reports 4<sup>th</sup> Quarter SFY 2017

True	Unsubstantiated	Pending
5	35	2

All allegations of maltreatment concerning foster homes are investigated by the Crimes Against Children Division (CACD) of the Arkansas State Police. DCFS staff do not actively participate in the investigation of these reports. Allegations of maltreatment regarding foster homes require the agency to assess the safety of all children residing in the home.

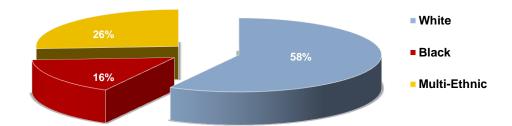

The following charts describe the characteristics of the 51 foster children involved in allegations of maltreatment with foster parents as the alleged offenders.
